

Ex. No. : 06

Date: 26/04/25

Register No.: 221701006

Name: AKSAYAA S V

SD Card

Aim

Implement an application to write the Register Number, Name and CGPA to SD card in text file format.

Procedure:

Step 1 : File -> NewProject

Provide the application name and Click “Next”

Step 2 : Select the target android devices

Select the minimum SDK to run the application. Click “Next”.

Step 3 : Choose the activity for the application (By default choose “Blank Activity”).

Click “Next”.

Step 4 : Enter activity name and click “Finish”

Step 5 : Edit the program.

Step 6 : Run the application, 2-ways to run the application.

1. Running through emulator
2. Running through mobile device

MainActivity.kt

```
package com.example.mad6
//MainActivity.kt
import android.os.Bundle
import android.widget.Button
import android.widget.EditText
import android.widget.Toast
import androidx.appcompat.app.AppCompatActivity
import java.io.File

class MainActivity : AppCompatActivity() {

    private lateinit var nameEditText: EditText
    private lateinit var rollnoEditText: EditText
    private lateinit var cgpaEditText: EditText
    private lateinit var saveButton: Button
    private lateinit var loadButton: Button

    private val fileName = "student_data.txt"

    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
        setContentView(R.layout.activity_main)

        nameEditText = findViewById(R.id.editTextText)
        rollnoEditText = findViewById(R.id.editTextText2)
        cgpaEditText = findViewById(R.id.editTextText3)
        saveButton = findViewById(R.id.button)
        loadButton = findViewById(R.id.button2)

        saveButton.setOnClickListener {
            saveData()
        }

        loadButton.setOnClickListener {
            loadData()
        }
    }

    private fun saveData() {
        val name = nameEditText.text.toString()
        val rollNo = rollnoEditText.text.toString()
        val cgpa = cgpaEditText.text.toString()
    }
}
```

```

if (name.isBlank() || rollNo.isBlank() || cgpa.isBlank()) {
    Toast.makeText(this, "Please fill all fields", Toast.LENGTH_SHORT).show()
    return
}

val data = "$name\n$rollNo\n$cgpa"

        android:layout_height="wrap_content"
        android:text="Save"
```

```
android:layout_marginTop="24dp"  
app:layout_constraintTop_toBottomOf="@id/editTextText3"  
app:layout_constraintStart_toStartOf="parent"  
app:layout_constraintEnd_toStartOf="@id/button2" />
```

```
<Button  
    android:id="@+id/button2"  
    android:layout_width="0dp"  
    android:layout_height="wrap_content"  
    android:text="Load"  
    android:layout_marginTop="24dp"  
    app:layout_constraintTop_toBottomOf="@id/editTextText3"  
    app:layout_constraintStart_toEndOf="@id/button"  
    app:layout_constraintEnd_toEndOf="parent" />
```

```
</androidx.constraintlayout.widget.ConstraintLayout>
```

Output

A mobile application interface with a light pink background. At the top, there are three input fields labeled "Name", "Roll No", and "CGPA". Below these fields are two purple buttons labeled "Save" and "Load". The interface is shown on a smartphone screen with a home indicator bar at the bottom.

A mobile application interface with a light pink background. At the top, there are three input fields containing the text "Aksayaa", "221701006", and "8.11". Below these fields are two purple buttons labeled "Save" and "Load". A circular hamburger menu icon is visible on the left side of the screen. The interface is shown on a smartphone screen with a home indicator bar at the bottom.

Result:

The experiment was conducted successfully
